

Lamp Modeling Order Form

(Prices valid until December 2024)

Modeling

Photopia customers or lamp manufacturers may purchase our services for building lamp models. All Photopia lamp models are full spectral models to enable color raytracing in Photopia 2014 and newer. LTI Optics retains the rights to lamp models created for generally available lamps. Thus, these lamps may be distributed in the general lamp library at the discretion of LTI Optics. Proprietary lamp models can be created as well for a higher fee. Proprietary lamps are lamps that your company manufactures for your own use only.

Customer

Company: _____ Name: _____
 Address: _____
 City: _____ State: _____ Country: _____ Postal: _____
 Telephone: _____ Fax: _____
